CRESTOR(R) Reduced the Risk of Cardiovascular Events in Elderly Patients in New Analysis of JUPITER

31.08.2009 - 15:08 Uhr, AstraZeneca

Barcelona (ots/PRNewswire) - A new analysis from the JUPITER study showed that CRESTOR(R) (rosuvastatin) 20mg reduced the composite primary end point of major cardiovascular (CV) events (combined risk of myocardial infarction, stroke, arterial revascularization, hospitalization for unstable angina, or death from CV causes) by 39% (p
