WIS@key to Unveil WIS@ID 3S App at Mobile World Congress Allowing NFC-Enabled Applications by the London 2012 Olympic Games

Geneva (ots) -

The newly redesigned WIS@ID Password and Personal Data Protector Version 3S continues to offer strong and secure storage of Personal Identifiable Information (PII), details of an individual that contain unique identity information.

WIS@ID continues to provide a "trusted digital identity" and is exploring integration with NFC technology to provide authenticated access, transaction, and communication benefits for WIS@ID users. WIS@ID plans to expand its consumer capabilities by the London 2012 Olympics, with enhancements such as the ease of conducting secure payments with a wave of the phone anywhere contactless card readers are used; secure building admittance and entry to events, transportation systems, and parking; effortless access to special offers, coupons, and discounts from smart posters or billboards.

Using its established e-Voting technology and expertise securing operations of banks and governments, WIS@key is enhancing WIS@ID to combine its strong authentication with social networking platforms to offer a medium for safe, binding transactions that can include voting as well as processing payment.

WIS@ID is available today from the App Store or Android Market, and it offers an expanded range of unique consumer protection features, including:

- free email certificates for registered users
- encrypted data backup on the Cloud
- encrypted messaging to maintain privacy of SMS, emails, and Facebook (Apple only)

In addition to the new design of the mobile app, WIS@key launched a desktop version for Mac OSX, making it even easier to add and update account details. A PC version is expected this spring. WIS@ID previously hit the top 5 iPhone apps in its category in the U.S.A. and is among the top utility apps worldwide.
