The aleo solar AG will end the full year of 2011 with a negative result of 25 to 30 million euros. This is for the most part due to the extraordinary expenses involved with payments in lieu for delivery contracts with a cell supplier from the years 2005-2008. A new agreement was reached for the entire period from 2012 to 2019 that takes prices conforming more to the market into consideration. aleo solar AG will publish the precise business results at the end of March 2012 with the annual report for 2011.
