Frankfurt Airport's (FRA) November 2001 traffic results continued to be affected by the aftermath of the September 11 terrorist attacks. However, the traffic decline has weakened: with the Passenger category registering a -10.9 percent change in November, versus a -13.9 percent change in October 2001. Consolidation of traffic at major hub airports like FRA has been a noticeable development. Transfer traffic via FRA has been strengthened by airline capacity adjustments and route cancellations at other airports.

Intercontinental traffic again recorded the biggest traffic declines. In particular, flights to Islamic states, North Africa and the Middle East, as well as to the U.S.A., were strongly affected. FRA's airfreight tonnage experienced a -8.6 change in November 2001, a more moderate decline compared to October (-11.7 percent) or even September (-13.3 percent).
