

HEART AND SOUL REVEALED

The Jazzmaster Open Heart 36mm is a sophisticated watch that celebrates craftsmanship in an effortlessly modern way. Its creative construction 'opens its heart' to reveal an intriguing and beautiful glimpse of the mechanical workings within.

Sized perfectly for the female wrist, its sleek contemporary style makes it an excellent choice for today's urban go-getter. Whether you're delivering a keynote, chairing a business meeting or hitting a rooftop party, the Jazzmaster Open Heart is a watch that subtly reflects the personality of its wearer.

Skeletonized and open-heart watches are a Hamilton specialty and our designers love working on original and unique dial cut-out shapes. On show in the Jazzmaster Open Heart is our innovative H-10 automatic movement with an extended power reserve of 80 hours. It also includes a hairspring made from the new alloy Nivachron™. The advanced anti-magnetic material makes this watch ideally suited to the pace and challenges of modern life.

With a chic and streamlined stainless steel case, the watch is available with a black, white or beige leather strap, or on a stainless steel bracelet. Our easy-click system allows the wearer to switch straps with ease, confident each color option will complement their black, ice blue, deep blue or mother-of-pearl dial. Revealed through the cutout dial are the mechanical parts that keep time ticking onwards: the balance, escapement and barrel, each assembled with total precision and skill.
