## NEWS RELEASE

### **Aequitec and CONDA.ch launch crowdinvesting collaboration**

Zurich, 24 August 2022 – Aequitec, a digital share register and cap table company, and CONDA.ch, a Crowdinvesting Platform, are launching their collaboration in automating the process flows around the issuers' share register. With the help of the Aequitec platform, issuers of the CONDA.ch community can manage their new shareholders easily, digitally and legally compliant on the Aequitec platform.

CONDA.ch customers will now benefit from the automation of business processes thanks to standardized contract generation, electronic signatures and a professionalization of their corporate governance structures. In addition, general meetings with many shareholders can be conducted entirely as a fully digital or multi-local event.

Aequitec customers will now benefit from a broad investor base through access to the CONDA community, and from being able to raise equity through online processes and accompanying marketing campaigns. With the professional investor network, suitable investors can be found for the own venture. Especially for fast growing start-ups from various accelerator programs, like the leading F10 FinTech Accelerator, new opportunities arise to establish their product developments faster in the market.

Christian Wilk, CEO of Aequitec, notes: "With the help of Aequitec, CONDA.ch customers can manage their new shareholders quickly and easily. Our joint customers can fully focus on their operational growth. For larger investments, the shares can also be booked into a securities account at almost all Swiss banks."

Linus Gabrielsson, CEO of CONDA.ch, emphasizes: "With this partnership, we can offer our customers the perfect complement to our service, as they are now also offered a modern share registry solution for the time after completing their crowdfunding round with us. Moreover, thanks to CONDA.ch, new capital raise opportunities are made available to Aequitec's customers and partners."

### **About CONDA.ch**

CONDA Switzerland, headquartered in Baar, was founded in 2021 as a joint venture between the Austrian crowdfunding platform CONDA and the Swiss start-up promoter and investor Braingelist. CONDA is a pioneer in crowdfunding for start-ups and SMEs. Since its founding in 2013, the company has successfully financed 150 projects with over 48 million Euros throughout the DACH region. CONDA now counts over 36'000 international investors among its community and gives them the opportunity to invest in companies in Austria, Germany, Switzerland, Liechtenstein, Slovenia, Slovakia and Poland across borders. On the CONDA.ch platform, which was launched in 2021, small and large investors alike now have the opportunity to invest directly in growing Swiss start-ups with great potential.

### **About Aequitec**

Founded in 2020 by Johannes Schneebacher, Dr. Christian Wilk, and Deon Digital AG, Aequitec helps stock and private companies to digitize their corporate governance processes. The Zurich-based startup supports its customers with a specially developed software platform. This offers the possibility to automate and digitally map corporate actions. This enables stock corporations, for instance, to hold their general meetings digitally or hybrid and to digitize their share register with a global connection to the banking financial system. The main shareholders are currently the founders and the start-up incubator F10.
